

## Army Logistics: Low Returns of Repairable Assets Are Costing the Army Millions: Nsiad-91-272

By -

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 48 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. Pursuant to a congressional request, GAO examined the Army's efforts in returning assets in need of repair to reduce procurement costs and improve military readiness, focusing on whether the: (1) Army has bought additional assets or cancelled repairs because it has not met its return-rate goal; (2) Army's reported return rate accurately reflects the actual rate of return; (3) Army's goal to return 85 percent of assets that need repair was established to maximize savings and efficiency; and (4) Army's efforts to improve rates of return will strengthen its materiel returns program. GAO found that: (1) the Army is purchasing additional assets and reducing the quantity of assets scheduled for repair because returns are not meeting its minimum goal; (2) four of the Army's six inventory control points were buying between 369 million and 815 million of assets that would not have been necessary if returns had been at the 85-percent goal; (3) one inventory control point, the Army Missile Command, improved returns management by identifying items with low returns and requiring item managers to determine the causes and report on...

*This book is definitely not simple to begin on studying but quite fun to see. I actually have read and that I am sure that I will go on to read through yet again once again in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.*
