

Kids Can Program Too!: Second Java Edition

By Ely Eshel

Createspace, United States, 2011. Paperback. Book Condition: New. 276 x 214 mm. Language: English . Brand New Book ***** Print on Demand *****.This book addresses the curiosity of computer-literate youngsters from grades 6 through 12 who want to learn how to write their own computer programs. Although programming is serious, it can also be a lot of fun - and this book turns the process into an enjoyable challenge rather than a boring task. For children: You may already know a lot about computers, and probably spend a lot of time using them. However, if you are curious about what's inside the computer, if you want to understand what makes it work, and how you can make it do what YOU want - which is what programming is all about - then this is the book for you. For Parents and Educators: Most children today practically live with computers, and they cannot even imagine a world without them. However, rarely are they given the opportunity to understand how computers actually work, let alone what programming a computer really means. There are no other books that satisfy the child's curiosity at a level that an average child can understand...

Reviews

This publication may be really worth a go through, and a lot better than other. It really is written in simple terms and never difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Natalie Abbott**

This book will not be simple to get going on reading but extremely exciting to read through. Yes, it can be playful, still an interesting and amazing literature. I am very easily could possibly get a delight of reading a written book.
