CHILDREN S UNDERSTANDING OF DEATH: FROM BIOLOGICAL TO RELIGIOUS CONCEPTIONS

CAMBRIDGE UNIVERSITY PRESS, United Kingdom, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.In order to understand how adults deal with children s questions about death, we must examine how children understand death, as well as the broader society s conceptions of death, the tensions between biological and supernatural views of death and theories on how children should be taught about death. This collection of essays comprehensively examines children s ideas about death, both biological and religious. Written by specialists from developmental psychology, pediatrics, philosophy, anthropology and legal studies, it offers a truly interdisciplinary approach to the topic. The volume examines different conceptions of death and their impact on children s cognitive and emotional development and will be useful for courses in developmental psychology, clinical psychology and certain education courses, as well as philosophy classes - especially in ethics and epistemology. This collection will be of particular interest to researchers and practitioners in psychology, medical workers and educators - both parents and teachers.
