The earliest coins of Greece which have been discovered are stamped with the head of an ox; and the legal code of Draco retains with true legal conservatism the otherwise obsolete practice of expressing values in terms of oxen. Indeed there is more than probability, there is proof as strong as the nature of the subject permits, that our present system of metallic coins are translations of the earlier cattle currency. The Greek talent of gold and the ox were undoubtedly equivalent; and the ox is of course the older standard of the two; and the small change of this commodity currency was likewise translated into corresponding silver and copper coins. We find the same equating, the presence of which we partly detect and partly infer in the Greek...
