

Laser Transmission Welding of Thermoplastics Using Local Laser Beam Modulation

By Andrei Boglea

Shaker Verlag Aug 2013, 2013. Buch. Book Condition: Neu. 208x146x15 mm. Neuware - The results described in the present work show for the first time for the polymer welding that through the use of laser modulations a reduction of the Heat Affected Zone, and therefore a reduction of the thermal load in both joining partners is possible, without losses in the weld seam strength. The evenly distributed laser energy in the joining area leads to a reduced depth of the weld seam compared to the conventional contour welding of polymers. Based on this aspect the experiments described in Chapter 6.3.2 indicate that the welding of parts with reduced material thickness, for applications where plastic parts with high requirements on the surface finish have to be joining, can be welded without any appearance of the weld seam on the visible surfaces. Therefore, a significant material saving of about 33% can be considered. Furthermore, the reduced thermal load of the joining partners enables the welding of fine structures without thermal deformation of these structures. Especially among the biomedical applications there is a variety of products with microfluidic channels that have to be hermetically sealed, usually by welding a plastic foil or cover...

Reviews

Extremely helpful to any or all category of individuals. It really is rally fascinating throug studying time period. I am just quickly could possibly get a pleasure of reading a composed ebook.

-- **Lawrence Keeling**

This publication may be worthy of a read through, and a lot better than other. It is among the most incredible book we have read through. Your daily life period will be change when you total reading this article publication.
