*This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It has been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, alter the way I believe.

Not illustrated. 1920 Excerpt: .distorted, scattered spicules of this type were found on the surface of a thin-bedded layer of limestone, which closely resemble the oblique spicules from Wales. *P. fenestrata* is represented in the Middle Cambrian fauna of China by cruciform spicules embedded in limestone, that have four slender, round rays meeting at the center of the spicule, but no specimens were found with indications of the skeleton of the sponge. The presence of spicules resembling those of *P. fenestrata* in the Ceratopyge limestone of Sweden is discussed by Moberg and Segerberg and an illustration given (pl. 1, fig. 5), but with the data available it is difficult to determine if the spicules belong to this species or to *P. hicksi* or an undetermined species. The same is true of all the spicules from Swedish Cambrian strata referred to *P. fenestrata* and *P. hicksi* Rauff (1894)! notes occurrence of species at localities in Norway and Sweden, but with only scattered spicules on which to base identification the determination of authors is necessarily tentative unless there is a considerable amount of material and actual comparison made of typical specimens with those from other localities.
