

Defense Logistics: Lack of Key Information May Impede Dods Ability to Improve Supply Chain Management: Report to Congressional Committee

By -

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 54 pages. Original publisher: Washington, D. C. : U. S. Govt. Accountability Office, 2009 OCLC Number: (OCoLC)298209751 Subject: Inventory control -- Automation. Excerpt: . . . IUID includes the application of a data matrix through direct inscription or placement of a permanent machine-readable label or data plate onto an item. The data matrix contains a set of data elements that form a unique item identifier. This data matrix identifies an individual item distinctly from all other items that DOD buys and owns, similar to the vehicle identification number on a car. Items can be marked either by the vendor before entering into DODs inventory, or by a DOD component after DOD takes possession of an item. In both cases, information about the item and the mark are uploaded to the IUID Registry, which is located in Battle Creek, Michigan, and managed by the Defense Logistics Agency. The registry serves as the central repository for data about all of the items in the DOD inventory that have been marked with a UID data matrix. Although the registry is intended to contain information about all of the marked items, DOD...
