Findings: Current Initiatives Airborne Laser The Program Definition and Risk Reduction (PDRR) phase (ABL) provides a well-defined path to an operational system exploiting the currently most mature chemical oxygen-iodine laser (COIL) technology. The PDRR aircraft will be required for several years after the ABL reaches an initial operational capability to continue capability growth of the ABL system in addition to operational concept development. An initial capability could be fielded by 2010. ABL has the potential to contribute to multiple missions in addition to the theater missile defense boost-phase intercept, to include enhanced range theater missile defense link-up through the EAGLE relay mirror constellation (described below), aircraft self-defense, launch site location, impact point location, imaging surveillance, and cruise missile defense. A robust continuing technology effort is required to realize potential capabilities. Space Based The project office has identified 13 specific issues that Laser (SBL) require...
