This ebook is worth acquiring. Better then never, though i am quite late in start reading this one. You will not truly feel monotony at at any time of your own time (that's what catalogues are for about if you ask me).

G millimeters (0. 08-0. 11 inch). The female differs in her greater size and rather slenderer body, and the more club shaped antenna, the terminal joint being twice as long as thick. Between the 3d and 4th joints are two distinct, minute subjoints, the 2d shorter but wider than the 1st; joints 4-9 are shorter and less hairy than in the male, while the 10th (terminal) joint is acute at tip, and subdivided into four subjoints. The abdomen is as long and as wide as the thorax, ending in a long, sharp point, the short but distinct ovipositor extending slightly beyond the tip of the body. There is a slightly marked pale spot above on the second segment. Length 2. 4-3 millimeters (0. 10-0. 12 inch).
